

Strategic Goals 2017 - 2020

Quality Assurance

- To create a comprehensive approach to evaluating competency and currency of midwives active practice
- To enhance and implement a QA program in accordance with the bylaws

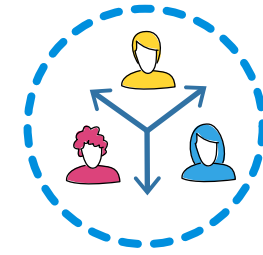

Organizational Capacity

- To provide relevant training and orientation to board, committee, and staff members, eg. media training, governance, inquiry & discipline
- To develop terms of reference for each committee in alignment with legislation and strategic goals
- To use information technology to optimally support and integrate CMBC functions

Partnership and Collaboration

- To strengthen partnerships with other health professional organizations and government to advocate for excellence in perinatal care
- To engage stakeholders for consultation regarding expanded midwifery scope of practice
- To work with educational partners to provide timely education for expanded midwifery scope items

Scope and Model

- To gather feedback from potential, past, and current perinatal clients and midwives to inform changes to the midwifery scope and model of care
- To review and recommend bylaw changes to reflect current realities and evolving practice
- To create a framework to allow alternate practice arrangements
- To enable midwives to work to the full extent of their knowledge, skills, and judgment in meeting community health needs
